INTEGRA
BIOLIFTING

The biological approach
for a fresher appearance.

INTEGRA
BIOHEALTH

*“ We want you feel good
in your own skin!*

Each treatment is preceded by a detailed patient consultation. Your clinician will explain what INTEGRA BioLifting can offer you personally, take you through the individual treatment steps and answer any questions you may have.

We don't leave anything to chance – it's all about your well-being.

The consultation and treatment both take place in the elegant INTEGRA Biohealth – Centre for Holistic Medicine and Dentistry – facility in Luxembourg (City).

*„ We want your skin to look
fresh and healthy – the
natural way. “*

/// Prof. Dr. Marcel Wainwright,
Anti-ageing specialist at INTEGRA Biohealth

*For a new, fresh
and vital appearance
in all naturalness.*

INTEGRA BioLifting is a treatment which rejuvenates the skin, neck and chest, leaving them radiating with a new-found freshness. A facelift without a scalpel, kind and gentle on a biological basis.

Small wrinkles with a big impact: deep frown lines, dark shadows under the eyes and a drooping mouth region are all features which leave a face looking inadvertently angry, tired or unhappy. So are less-pronounced cheekbones, fine lines, a poorly defined chin contour and disharmonious jaw proportions: whatever aspect of your face, neck or chest is causing you concern, with our INTEGRA BioLifting technique we offer a gentle, biological anti-ageing treatment for a natural, dynamic and healthy look.

Advantages of INTEGRA BioLifting:

- / Non-surgical intervention, gentle liquid lift
- / Biological approach based on hyaluronic acid and platelet-rich plasma (PRP)
- / Particularly minimally invasive and almost pain-free cannula technique
- / Avoids pain and bruising
- / Promotes cell and collagen production

Prof. Dr. Marcel Wainwright

Your anti-ageing- specialist

Prof. Dr. Marcel Wainwright is a highly sought-after speaker in the field of facial aesthetics all over the world (e.g., IAFA International Academy for Facial Aesthetics in Miami) and was employed by a leading manufacturer of hyaluronic acid.

At INTEGRA Biohealth, Prof. Dr. Wainwright practices biological anti-ageing therapies, biological dentistry, minimally invasive oral surgery and implantology.

*„The teeth are the picture,
the face the frame.“*

Inspired by the pain-free, well tolerated treatment methods employed in biological dentistry and minimally invasive oral surgery, Prof. Dr. Wainwright has completed an extensive range of further training courses in anti-ageing therapies.

He has already helped countless patients – including well-known public figures – to achieve a more attractive appearance and improved feeling of well-being – plus, as a result, a higher quality of life.
